

What is the opportunity?

As an HTML5/JS Developer, you will play a critical part on an innovative team within AquaQ Analytics working on modern web platforms.

What will you do?

- Build modern web UIs in HTML5 to enable an enhanced client experience.
- Interact with a variety of services which use REST, message buses, web sockets etc for UI data & updates.
- Participate in agile practices and drive forward the adoption and approach to delivery.
- Interact with components using Java technologies and cloud friendly stacks.
- Maintain and enhance, when necessary, the existing application UI.
- Assist with 2nd line support as necessary.

What do you need to succeed?

Must-Have

- Minimum of 2 years of experience with modern web technologies: ReactJS or Angular, ES6, HTML5, CSS, SPAs, Javascript, build chains.
- Minimum of 2 years of Strategic maturity: excellent communication skills, drive to operate in an agile team, ability to work with global teams.
- 1 years of Technical maturity: experience with enterprise application development, productionisation, complex downstream system dependencies.
- Passion to drive the team forward, contribute to innersource components and advance both the team and organisation forward with technical excellence and best practices.

Nice-to-have

- UX experience – participating in UX design, including mobile clients.
- DevOps experience – working with Jenkins, Nexus, deployment tooling and scripting.
- 1 year Technical knowledge: Java 1.7+, J2EE, Maven.

Benefits

In addition to highly competitive salaries we offer the following:

- Accelerated career progression/ training and development plan
- Company pension plan
- Company bonus scheme
- Increasing holiday entitlement
