

AquaQ Analytics

Business Analyst Role:

AquaQ Analytics is currently looking for an experienced Business Analyst. You will be working as a Business Analyst within the PMO function, supporting the delivery of strategic current and future initiatives.

As a Business Analyst you will:

- * Undertake all analysis work required by projects including requirements gathering, functional specification creation, process mapping, data analysis, coordination of user testing etc
- * Manage small/medium size projects with guidance when required
- * Manage own time efficiently to ensure that deadlines on multiple tasks/initiatives are met
- * Present recommendations to Management e.g. PMO Senior Business Analyst, Head of Change/PMO
- * Provide concise, accurate reporting of work progress to key stakeholders, both in the PMO and outside of the PMO
- * Feedback where necessary to the Senior Managers/Directors
- * Provide efficient communication channels with other departments
- * Assist in the enforcement of project deadlines and schedules

Essential Criteria:

- * Has excellent communication skills
- * Used to a fast-paced and dynamic working environment
- * An understanding/knowledge of AGILE
- * Has the ability to understand and interpret business information, no matter how vague the initial view looks
- * Has an enthusiastic approach to moving the business forward and is resourceful to be able to move the business forward
- * Able to think creatively
- * Has a "Can do" attitude and ability to 'Think outside the box'

Desirable Criteria:

- * Previous experience of project work, in delivering small/medium size projects.
- * PRINCE2 Qualified (Foundation level) desirable but not essential

To apply for this role, please forward your CV to careers@aquaq.co.uk clearly marking the role you are applying for.
